RADHA KRISHNA CHALAMALASETTI

B.Tech CSE (IoT) Student | VNR VJIET

Hyderabad, Telangana

PROFILE

B.Tech CSE (IoT) student at VNR VJIET with hands-on experience building IoT prototypes and Full Stack Development. Interested in technology, AI-enabled solutions, hackathons, and student community engagement. Strongly focused on learning by building and communicating technical ideas.

EDUCATION

VNR VJIET, Hyderabad

B.Tech, Computer Science & Engineering (IoT) | Expected 2029

CGPA: 9.7/10 | **Class XII:** 985/1000 | **CLASS X:** 9.8/10

Relevant areas: Data Structures & Algorithms, DBMS, Computer Networks, Web Development, IoT

PROJECTS

Campus Event Management — Backend / Web Project

• Developing a campus event platform using Node.js, Express.js, MongoDB, Mongoose and REST APIs. Worked with CRUD operations, validation, authentication concepts, middleware and role-based access control; used Postman for API testing.

Real-Time AC Load Analyzer — IoT Prototype

• Built an ESP32-based AC load monitoring prototype using current/voltage sensing, a 16×2 I2C LCD, relay and Wi-Fi. Measures electrical parameters, provides local display output and sends readings to the Blynk platform for remote monitoring.

AI-Based Smart Farmer Procurement System

• Designed a smart procurement workflow aimed at reducing farmer waiting time and procurement-center congestion. Concept includes multilingual registration, slot allocation, queue/token management, procurement-stage tracking, notifications and dynamic rebalancing across centers.

ACHIEVEMENTS & RECOGNITION

First Place — CargoIQ Ideathon — Recognized for an AI-powered logistics solution at an ideathon organized by CSE, VNR VJIET, with CSI SBC VNR.

Round 1 Qualifier — Abode Hackathon - Advanced to Round 2 of the hackathon

Reliance Foundation Undergraduate Scholar — Selected as a Reliance Foundation Undergraduate Scholar based on academic merit.

TECHNICAL SKILLS

Languages: C, C++, Python, JavaScript

Web / Backend: Node.js, Express.js, REST APIs, MongoDB, Mongoose

Tools: Git, GitHub, VS Code, Postman, Arduino IDE

Core: Data Structures & Algorithms, DBMS, API development, CRUD, Authentication.

AI/ML: Machine Learning, Generative AI, LLMs, Retrieval-Augmented Generation (RAG)

LEADERSHIP, HACKATHONS & INTERESTS

Hackathons / Building: Participated in project-based hackathon and ideathon activities, developing practical software and IoT solutions.

Interests: AI applications, AI Powered Full Stack Development, IoT, problem solving, chess and table tennis.
